

Climate Pollution Assessment and Mitigation Roadmap for IPL 2022 *(Rajasthan Royals)*

Schneider Electric

May 2022

Process Flow

Protocols and Standards

- GHG Protocol's Scope 3 (Corporate Value Chain) Emissions Accounting and Reporting Standard
- 2006 IPCC Guidelines for GHG Inventories
- IPL 2010 Carbon Footprint Assessment Methodology developed with United Nations Environmental Program's Sport and Environment Unit

Goal & Scope Definition

Goal

- Conducting a Baseline GHG Inventory for an IPL Cricket Match in accordance with 2006 IPCC Guidelines for GHG Inventories, and WRI's Scope 3 (Corporate Value Chain) Standard.
- Reporting the GHG Inventory through narratives, tables and charts intended to convey the salient outcomes of the climate pollution estimation of the company to senior management.
- Footprint Mitigation Roadmap Report identifying short, medium and long-term climate pollution reduction projects that can be implemented through engagement with upstream partners/vendors related to raw material extraction and processing

Goal & Scope Definition

Scope: Operational Boundary

Emission Category	Activity Group	Activity Sub-Group
Purchased_Goods_and_Services	Materials	Agri_Inputs
Purchased_Goods_and_Services	Materials	Agri_Inputs
Purchased_Goods_and_Services	Materials	Construction
Purchased_Goods_and_Services	Materials	Paper
Purchased_Goods_and_Services	Materials	Plastics
Purchased_Goods_and_Services	Food_and_Beverages	Alcoholic_Beverages
Purchased_Goods_and_Services	Food_and_Beverages	Dairy
Purchased_Goods_and_Services	Food_and_Beverages	Meat
Purchased_Goods_and_Services	Food_and_Beverages	Packaged_Water
Purchased_Goods_and_Services	Food_and_Beverages	Grains
Purchased_Goods_and_Services	Food_and_Beverages	Soft Drinks
Upstream_emissions_of_purchased_fuels	Energy	Fugitive_Emissions

Chart 6 – GHG Emissions Summary

Emissions by Stakeholder (excluding TV Spectators)

Context 1 – Climate Pollution Impact

Greenhouse Gas Emissions (Climate Pollution)
emitted by a typical IPL Rajasthan Royals Match
in 2021 is estimated to be:

9,442 metric tonnes of CO₂e

Context 2 – Primary Climate Pollution Activities

1. Fossil Fuel Combustion for Grid Electricity Generation, Transmission and Distribution Losses and related Fossil Fuel Extraction activities for TV Viewing of IPL Matches
2. Fossil Fuel Combustion for Air Travel
3. Electricity and other resource use by Luxury Hotels
4. Manufacturing of Construction Materials used in Stadium Construction
5. Fossil Fuel Combustion for 4 Wheeler Travel by Management Executives, Staff and Spectators

Context 3 – Primary Climate Polluting Stakeholders

1. TV Spectators
2. Rajasthan Royals Hospitality & Travel
3. Stadium Spectators
4. IPL Sponsors

Context 4 – Mitigation Roadmap for IPL 2023

TV Spectators: *reduced AC use when watching IPL at home (communication campaign)*

Rajasthan Royals Hospitality & Travel:

- 1. substituting air travel for bus/high speed train travel by high-ranking officials and Team Members for some city pairs within 6-8 hours of travel – for at least 2 IPL Matches (along with communication campaign)*
- 2. Selecting hotel partners with the lowest energy consumption per room-night in the 4-Star Hotel Category (i.e. not staying in 5-Star Hotels for atleast 25% of room nights per year)*

Stadium Spectators: *provision of high quality free public transport, especially free fan-buses to pickup spectators from key locations in ci*

IPL Sponsors:

- 1. substituting air travel for bus/high speed train travel by high-ranking officials and Team Members for some city pairs within 6-8 hours of travel – for at least 2 IPL Matches (along with communication campaign)*
- 2. Selecting hotel partners with the lowest energy consumption per room-night in the 4-Star Hotel Category (i.e. not staying in 5-Star Hotels for atleast 25% of room nights per year)*
